

Precision Guidance Kit - Army

Proposed Recipient: ATK Advanced Weapons

Address of Recipient: 4700 Nathan Lane N; Plymouth, MN

Amount of Request: \$7.5 Million

Explanation of Request

Purpose: The Army has a need for increased precision for the Infantry Brigade Combat Teams. The Army's 155mm PGK program is providing more responsive, more precise fire support capabilities. This same technology is adaptable to 105mm artillery and 120mm mortar rounds.

Why is it a good use of Taxpayer funds: Developed in parallel with other weapons systems programs at a significantly accelerated schedule and a reduced cost due to commonality and technology that has already been tested and proven.
